

Neighborhood Streets Reconstruction Project #467

Project Scope

- Reconstruct 11 streets
- New concrete pavement with curbs and sidewalks
- New storm sewers, water mains and services and sanitary sewer mains and services
- No additional right of way acquisition.
- Tree Protection

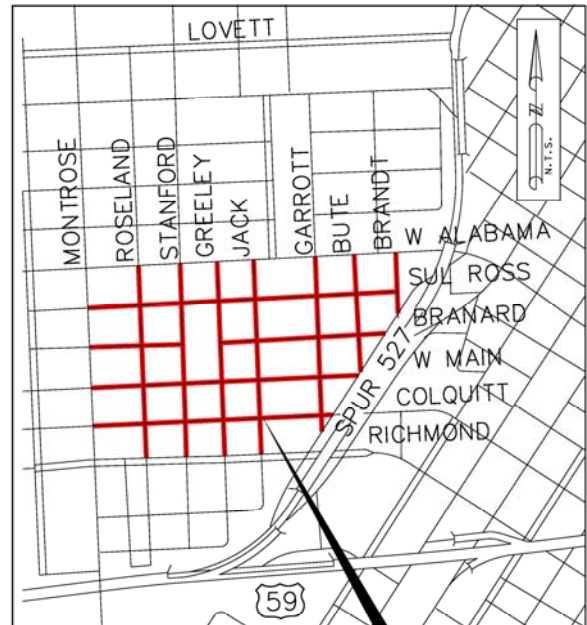

Project Benefits

- Provide direct benefits to over 978 residents and indirect benefits to more than 8X that number.
- Improved water pressure, better drainage, improved driveways, and wider sidewalks and curb ramps.
- Augmented safety.
- Less system outtages with new water lines.
- Elimination of asbestos cement and cast iron pipe.
- Upsized storm sewer system to reduce flooding.

Project Construction

- Relocate private underground utilities. AT&T utility relocation to be complete by March 2017.
- Construct Alabama storm drain before neighborhood.
- Construct water, sewer, and storm sewer systems just prior to roadway / sidewalk improvements at surface.
- Build roadways in two block segments.
- Limit road closures; keep 1/2 street open.
- Notify residents in advance of driveway / road closure.
- Construct improvements from northeast to southwest.
