

# Southland NEIGHBORHOOD RECONSTRUCTION

## Southland Area CIP Number: M-410024

This Capital Improvement Plan project is funded and currently in design with construction planned for 2020. The project boundaries are Old Spanish Trail to the north, 288 to the west, Scott St. to the east, and Alice St. to the south. The project proposes to reconstruct the Southland Area in three phases. Improvements to neighborhood streets will include: replacement of pavement, an upgraded drainage system, new 5-foot sidewalks with ramps to meet ADA standards, water and wastewater utilities as necessary. All work will be done within the existing right-of-way.

**ABOUT REBUILD HOUSTON:** Approved by voters in 2010, ReBuild Houston is the City's innovative program managed by the Department of Public Works & Engineering. Its mission is simple — to reduce flooding and improve mobility and quality of life throughout the city. Its fiscally responsible approach (pay-as-you-go) is to pay off old debt each year and use the remaining funds to reconstruct our streets and drainage. To make the most out of available revenue, reconstructing streets and drainage systems are completed in areas of the city that have the greatest need, and where reconstructing the old infrastructure will have the greatest benefit to the community. Rebuild Houston makes the most of every dollar spent to build better streets, better drainage and a better future.
