

CAPITAL IMPROVEMENT PROJECT FACT SHEET

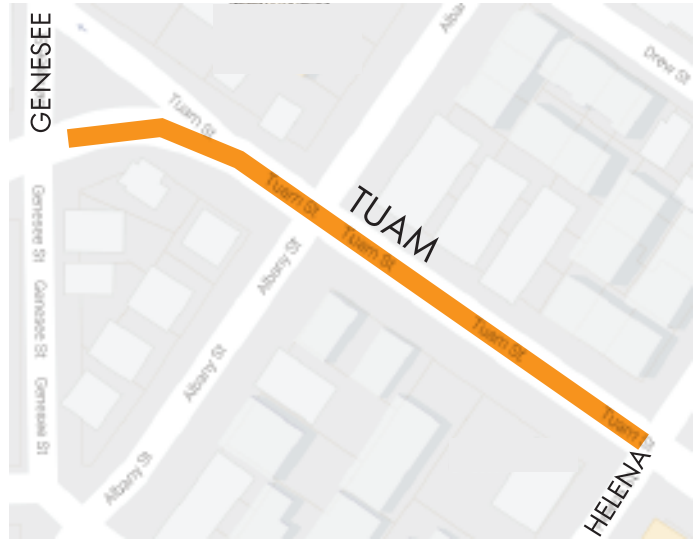

Gillette Trunkline (Genesee Segment)

M-410290-0003-4

Effective June 8, 2017

PROJECT DESCRIPTION

The Gillette Trunkline Project (Genesee Segment) will provide storm drainage improvements to address and reduce the risk of structural flooding. Improvements include modification of street conveyance and sheet flow, and will also provide detention as needed for mitigation.

PROJECT IMPROVEMENTS

Concrete Paving

Curbs

Sidewalks

Driveways

Underground Utilities

PROJECT TIMELINE

PROJECT UPDATE | CONSTRUCTION ON TUAM BETWEEN GENESSEE AND HELENA

Construction along Tuam between Genesee and Helena is underway. A critical portion of the storm sewer reconstruction has been completed and we are in the process of replacing the pavement. Our contractors are working diligently to ensure that the pavement and traffic flow remain as safe as possible during construction. We expect to have the pavement on Tuam updated by the end of July 2017. We apologize for the inconvenience.
