

# ROSELAND AREA RECONSTRUCTION

N-210005-0001

This Capital Improvement Plan neighborhood project is funded and starting design in 2016 with construction planned for 2020. Reconstruction will include reconstructing the roadway and replacement of underground storm drainage and sewer lines. Per design standards, a 6-foot sidewalk will be included on the designated transit corridor connector streets Kyle, Roseland, Stanford, and Greeley. A 5-foot sidewalk will be included on all other streets. Where possible, sidewalks will accommodate existing trees. All work will be in existing right of way.
