

WYNNEWOOD ACRES AREA

Reconstruction

Wynnewood Acres Area — (CIP number M-410014)

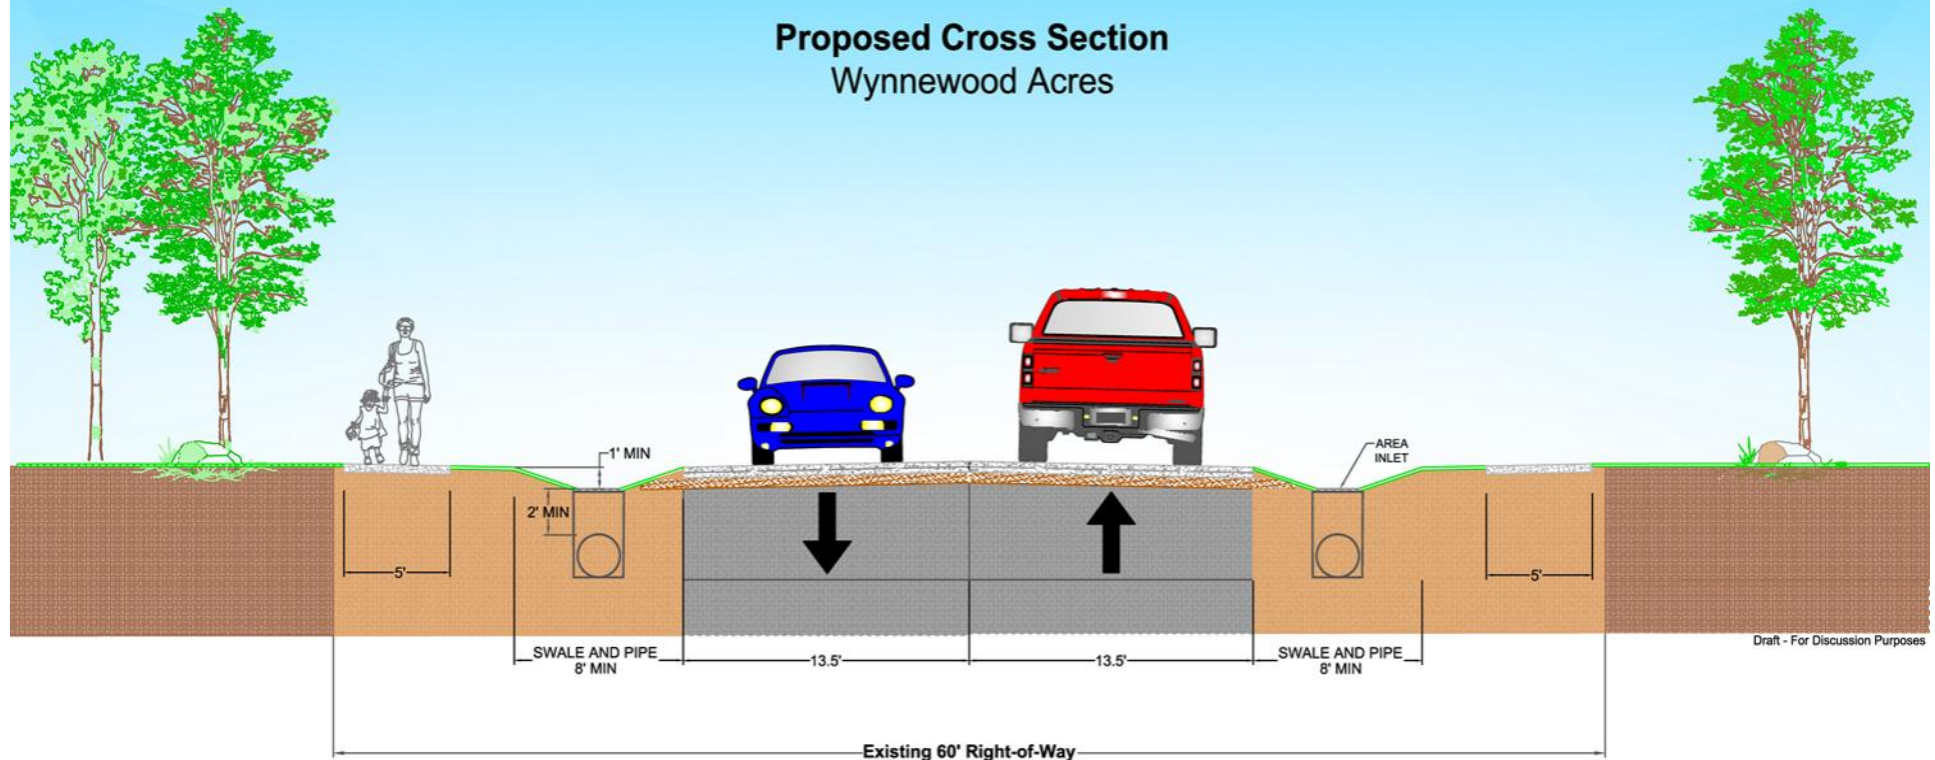

This Capital Improvement Plan drainage project is funded and starting design in 2016 with construction tentatively planned for 2019. All streets and driveways up to right-of-way will be reconstructed with concrete pavement. The project will increase the capacity of the storm drainage system by replacing existing ditches with pipe and swale system. Water and wastewater will be replaced as needed. Per design standards, 5-foot sidewalks will be included on all streets. All work will be within existing right-of-way.

ABOUT REBUILD HOUSTON: Approved by voters in 2010, ReBuild Houston is the City's innovative program managed by the Department of Public Works & Engineering. Its mission is simple — to reduce flooding and improve mobility and quality of life throughout the city. Its fiscally responsible approach (pay-as-you-go) is to pay off old debt each year and use the remaining funds to reconstruct our streets and drainage. To make the most out of available revenue, reconstructing streets and drainage systems are completed in areas of the city that have the greatest need, and where reconstructing the old infrastructure will have the greatest benefit to the community. Rebuild Houston makes the most of every dollar spent to build better streets, better drainage and a better future.
