

GRAY & TAFT AREA NEIGHBORHOOD RECONSTRUCTION

Gray & Taft Area (CIP Number N-210008)

This Capital Improvement Plan project is funded and starting design in 2016 with construction scheduled for 2020. Most streets do not currently meet the City's paving design standards regarding street width. Reconstruction will include full reconstruction of roadway with curb and gutter and replacement and adequate sizing of underground storm drainage. Water and waste water lines will be replaced as necessary. Per design standards and as feasible, five-foot sidewalks will be installed. Where possible, sidewalks will accommodate existing trees. All work will be in existing right of way.
