

Inwood Forest RECONSTRUCTION PROJECT

Inwood Forest Area CIP Number: M-410025

This Capital Improvement Plan project provides storm water drainage and paving improvements to reduce the potential for structural flooding in the Inwood Forest neighborhood. The reconstruction will include new street pavement, and construction of sidewalks. Wastewater and water utilities will be updated as necessary. All work will be done within the existing right-of-way.

ABOUT REBUILD HOUSTON: Approved by voters in 2010, ReBuild Houston is the City's innovative program managed by the Department of Public Works & Engineering. Its mission is simple — to reduce flooding and improve mobility and quality of life throughout the city. Its fiscally responsible approach (pay-as-you-go) is to pay off old debt each year and use the remaining funds to reconstruct our streets and drainage. To make the most out of available revenue, reconstructing streets and drainage systems are completed in areas of the city that have the greatest need, and where reconstructing the old infrastructure will have the greatest benefit to the community. Rebuild Houston makes the most of every dollar spent to build better streets, better drainage and a better future.
